

[React.js:](#)

- Pros: Large community, reusable components, strong ecosystem
- Cons: Steep learning curve for hooks/context API
- Suitability: Highly suitable; integrates well with Next.js and Tailwind CSS

[Next.js:](#)

- Pros: Server-side rendering, SEO friendly, file-based routing
- Cons: Slightly more complex setup
- Suitability: Best choice for the project; supports API routes, SSR, and Prisma integration

[Vue.js:](#)

- Pros: Simple learning curve, reactive data binding
- Cons: Smaller ecosystem than React, less TypeScript support
- Suitability: Could work, but less suitable than React/Next.js for this project
